**GUEST Battery Pal Magnum™**

Two-stage battery charger and automatic float charger. Small and lightweight – stores in glove box or tool kit. Charges and maintains from 5 to 250 amp hour batteries. Maintains a charged battery up to 500 amp hours. Automatic safety shutoff circuit in case of overload. Red and green LED indicators indicate charging progress. Unique "float" circuit will not boil out electrolyte or overcharge your batteries. Safe for both flooded (wet) and gel-cell batteries. Not for use with 6-volt electrical systems. 3-amp battery charger. Operating voltage 90-140V AC,50-60Hz.

**MINN-KOTA 6 AMP Battery maintainer**

Minn Kota maintainers are ideal for keeping your marine batteries charged during prolonged periods of inactivity. With a maintainer on board, you'll keep your deep cycle and starting batteries in good working order and ready to go.

- Provide light charging and maintenance for marine batteries
- Maintain charge levels during storage and extended periods of non-use
- Waterproof, shock- and vibration-resistant construction
- Short circuit, reverse polarity and ignition protected
- For use with 12V/6-cell batteries (50-130 amp hour rating) that are flooded/wet cell, maintenance free, or starved electrolyte (AGM) only

**MINN-KOTA DC Alternator Chargers**

**NEW**

Charges one, two or three Trolling Batteries

- LED indicators
  - Red = check connection (by battery)
  - Green = alternator power on
  - Yellow = charging trolling batteries
- Turns off when engine not in use
- Low profile extruded aluminum enclosure
- Waterproof and corrosion resistant design
- FCC compliant
