

Actuator Zinc-Plated

The Atwood hydraulic surge brake system has been designed to provide reliable and efficient automatic braking for towed equipment applications. This system offers the benefits of braking performance that is superior to comparable hydraulic or electric brake systems on the market with the advantages of being compact and light-weight. Fits 3" wide tongues with 2" balls meets S.A.E. class 4 ratings.

**Model 80 Disc Brake Actuator
8000 lbs. capacity**

- Cast ball clamp
- Extended latch lever
- Exterior emergency safety cable lock and release
- Vinyl coated coiled emergency stop cable
- Safety lock pin with back up position
- Includes 8000# rated 2" ball with 1" shank

ORDER NO.	DESCRIPTION	PRICE
TIE 86147	8000 LB. Actuator	\$316.39
TIE 81103	Free Backing Solenoid	\$75.80

**Model 66 Disc and Drum Brake Actuators
(6600 lb. capacity)**

The unique all aluminum master cylinder incorporates the shock absorber into the master cylinder assembly. This exclusive product feature was designed into our master cylinder to provide the tow vehicle operator with a warning signal when the brake fluid is at a low level.

- Cast ball clamp
- Extended latch lever
- 2" Ball
- Exterior emergency safety cable lock and release
- Vinyl-coated coiled emergency stop cable
- Safety lock pin with back up position
- New emergency safety cable ball stop

Bearing Buddy

Prevents Trailer Wheel Bearing Failure

Millions of bearings owe their lives to it!

- Keeps water and dirt out of hubs
- Makes boat trailer wheels safely submersible
- Ends the mess of repacking bearings
- Pressure relief feature protects hub seals, prevents overfilling
- Quick, positive lubricant level check
- Made of steel and 100% inspected for long term tight hub fit
- Heavy chrome plated barrel
- Stainless steel internal parts

Bearing Buddy II

With Auto Check. Quick, positive visual check for lubricant level and internal hub pressure. Fits hubs with 1.98" opening.

ORDER NO.	PRICE
BBD 42202	\$24.80

Bra

The Bearing Buddy* automatic pressure relief feature will allow the excess grease to escape. While trailering, this grease can be thrown onto wheels. Bearing Buddy Bra fits over the Bearing Buddy to eliminate this condition.

BBD 70019	Fits 1980, 1980T, 1938 & 1968	\$3.04
BBD 70023	Fits 2328, 2441, 2717 & 2562	\$3.04

Stainless Steel Wheel Bearing Protector

The Stainless Steel Bearing Protector keeps water and dirt from all trailer bearings, period. It simultaneously keeps bearings properly lubricated and extends their service life even when the trailer is subjected to moisture from outdoor storage or frequent submersion in saltwater or freshwater at boat launching ramps. The protector is a stainless steel barrel that is pressed in the trailer wheel hub in place of the dust cap.

FULTON

Bearing Saver

Engineered specifically to protect bearings from the elements during all trailer operation, the BEARING SAVER™ and HUB PROTECTOR helps take the worry out of submerging your wheel hubs during the launching and loading of boats, as well as during long trips. A unique coiled stainless steel spring, combined with a neoprene seal, maintains grease under constant pressure when filled.
