NOI SFSB	Screw in fasteners f/ 3/4" thick (pk 10)	\$14.12

Photo shows Halo Max installed on Bravo Drive

Drive Showers

These showers use proven 90 degree pick-up ports, along with a pin which acts as a debris filter. By dividing the tube in half, anything small enough to get past the pin will also be small enough to get out the dump ports. This is the only system that guards against the shower plugging up with debris, which without warning; will cause them to fail at cooling your drive.

Not only will this mounting system NOT void your MerCruiser Corrosion Warranty, but it makes installation a snap. Simply swap out one bolt at the top of the drive and two nuts on the lift rams. No more drilling holes in your drive!!

Two models to choose from

SUMMIT- Fits all stock Alphas and some Bravo units. The Summit with it's top bearing cap design and 7 dump ports will cool the drive by 50+ degrees. Mounting hardware included

HALO MAX- Fits all stock Bravo's. Will not fit Alpha drives. The Halo Max's 15 strategically placed dump ports targets only the sides and the back of the drive, and doesn't waste any of it's cooling water on the top bearing cap. It drops the oil temperature 60+ degrees. Mounting hardware included.

ORDER NO.	DESCRIPTION	PRICE
BRI SUMMIT	Summit drive shower	\$189.95
BRI HALOMAX	Halo Max shower	\$209.95

Sound Panels - Self-adhesive

QL Sound Absorbent Panels effectively muffle engine noise. They are made of recycled foam plastic. QL Sound Absorbent Panels meet the fire safety requirements for CE marking and withstand a max. temperature of 200°C. Sold in rectangular panels: 20" x 40", which are light to transport and to apply and can easily be cut to shape with a sharp knife. It is important to fit the panels tightly together, using adhesive tape to seal the joints to prevent noise leakage, or penetration of water, which could be absorbed by the material.

ORDER NO.	DESCRIPTION	PRICE
VOL 41103803	20" x 40" x 3/4"	\$22.50
VOL 41103804	20" x 40" x 1-1/2"	\$27.80
VOL 41103805	20" x 40" x 2"	\$39.60
