

Motor Tilter

Motor Tilter. Helps to tilt motor back safely with less strain. It is lightweight, compact, for easy stowing and adjustable to fit the shrouds of any size outboard motor with hand holds. It is most handy to have aboard when launching, retrieving, mooring or beaching. It is made of heavy gauge 1" diameter ANODIZED aluminum tubing which helps prevent salt water corrosion and weathering. Durable aluminum castings are cushioned at all contact points to prevent marring. Folds flat. Handles motors to 40 h.p.

Doel-Fin by **DAVIS**

Doel-Fin® is the original hydrofoil developed by an aeronautical engineer to **improve overall performance on all boats with outboard motors or outdrive units.** Molded in 2 pieces of guaranteed unbreakable, high-strength plastic, each foil is designed to flex independently to absorb shock. The positive effects include greater stability, consistent planning at lower RPM, faster out-of-the-hole performance, steadier turns, higher top-end speeds and lower bow rise at all speed.

- Doel-Fin improves overall performance – even on boats with well-designed hulls
- Save up to 30% on fuel consumption
- Faster out-of-the-hole for happier water skiers
- Maintain lower planning speeds without constant throttle adjustments for wakeboarding, tubing or beginning skiers
- Less bow rise for better visibility and increased safety.

StingRay XR III Hydrofoil

The Premier Stabilizer in the Hydrofoil line Same great added benefits as the XP II design PLUS

- No Drill Mounting Design
- Sleeker Hydrodynamic Profile
- Captive Prop-Wash Resulting in Improved Thrust
- Fastest Hole Shot of all Hydrofoils

MDY JRX III2	White	\$139.75

Sailboat Dolly

Helps to launch most small board-type sailboats. Vinyl covered tube fits into opening of center or "dagger" board. Hull rests on poly covered supports. Made of high tensile steel tubing with 1/2" zinc plated axle. Rolls easily on 4-7" rubber tired wheels. Ideal for moving sailboats from car to waterfront at lake homes, campsites and resorts. Measures 11" H, 9-1/2" D and 5/8" W. Stable, widetrack 24" wheel span.

StingRay XP II Hydrofoil

Hydrofoil Stabilizer now made with Speed-XP™, an extreme performance hydrophilic material, making the worlds fastest hydrofoil stabilizer even faster! Speed-XP is a clear hydrophilic (water-absorbing) material that is thermally bonded to the base polymer material of the hydrofoil. The surface of this material is hard when dry and looks like a new wax job-however the "magic" of its performance is released when the surface becomes wet...Speed-XP™ acts like a microscopic sponge when wet and will bind a very thin layer of water to the surface of the hydrofoil. The result is running water on water – a dramatic reduction in hydrodynamic drag and improved performance.
