

330 TOOLS

STAFFCO L.L.C.

Gearcase Service Tool

This is a fast effective tool for removing and installing lower unit oil drain plugs. The "T" handle design allows 10 times more torque than a screwdriver, and the driver tip prevents slipping and damage to the oil plug. It will even remove worn out screws that a screwdriver will not. Also includes hex key for Bombadier.

ORDER NO.	DESCRIPTION	PRICE
STF ST20	Gearcase Tool	\$39.95
STF 300	Updated Replacement Handle	\$19.95

551-34PV Pressure/Vacuum Tester (Combination Unit)

CDI Marine Engine Diagnostic Software **NEW**

Version 3.0 of MEDS, the Marine Engine Diagnostic Software system available from CDI Electronics, Inc. is available for your service area! MEDS multi-engine platform can assist you in diagnosing Yamaha and Mercury engines with one, simple to use operating system. Point-and-click features can increase your troubleshooting time and efficiency! Simply connect the test cable, click on the test parameter needed, and start the diagnostic software.

- Software operates on most Windows operating systems from Win 95 through Vista
 - No need for the different engine test software...MEDS maintains the similar software platform for all available engine test categories
 - Multi-Engine platform for either Yamaha or Mercury engines
 - Engine interface modules plug in-line with the MEDS test cable
 - Requires less than 1 Meg of memory to operate
 - 10' Interface cable is isolated to protect the computer test equipment
 - Toll -free technical support
- M.E.D.S. 3.0 Applications Supported
