GARMIN. GPSMAP®/Sounder 545s

This offshore chartplotter boasts the brightest, sharpest, most colorful graphics you've ever seen on a 5-inch screen. The GPSMAP 545 has a 5" VGA display; preloaded BlueChart g2 maps of the U.S. coast; and simple, straightforward buttons and menus. You can add the optional BlueChart g2 Vision SD™ card for even more enhanced features.

Navigate the High Seas

The 545 has preloaded detailed maps cover all U.S. coastal areas and the Bahamas. The SD card slot makes it easy to add additional maps without connecting to a computer. And with a simple, intuitive interface and high-speed processor, the 545 makes navigating easy.

THE GPSMAP 545s, comes with a powerful digital sounder (up to 1 kW) and dual frequency transducer that clearly paints depth contours, fish targets and structure. It's also CANet™ compatible, so you can share sounder data with another chartplotter on your boat. For continuously-updated weather information, you can add the optional GXM 31 antenna to receive XM satellite weather, including NEXRAD radar, and hundreds of XM radio stations right on your chartplotter.

Add Extras with BlueChart® g2 Vision

With the optional BlueChart g2 Vision SD card, you can add a whole new dimension of exceptional features to your chartplotter.

- 3D mariner's eye view or fish eye view provides you with a 3-dimensional perspective of map information, both above the waterline and below it.
- High-resolution satellite images and aerial photographs help you orient yourself in unfamiliar areas.
- Auto guidance technology searches through all relevant charts to create a route you can—actually follow one that avoids obstacles, shallow water, buoys and other obstructions.

GPSMAP® 440

Vital weather data, such as NEXRAD radar, forecasts, and current conditions is graphically displayed directly on the chart – so you can spend more time enjoying the water and less time worrying about the weather. Plug in optional BlueChart® g2 Vision™ cards to add true 3D-view detailed mapping capabilities (both above and below the waterline), plus helpful auto guidance, high-resolution photomapping detail, and “real picture” aerial photos of ports, harbors, marinas, waterways, navigation landmarks and other points of interest.

Product Features and Specifications

GPSMAP 440

- Ultra-bright 4" diagonal QVGA display, 320 x 240 pixels - over 800 nits of brightness
