GARMIN BlueChart® Cartography is GARMIN's exclusive marine cartography. This line of cartography products is designed to provide interactive viewing of detailed nautical chart data, thereby providing navigators with innovative object-oriented cartography. These detailed electronic nautical charts look just like paper charts when displayed on your GARMIN chartplotter. BlueChart® data will include shaded depth contours, inter-tidal zones, spot soundings, wrecks, nav aids, port plans, restricted areas, cable areas, anchorages, and more. Additionally, BlueCharts® include information from the paper chart used in the digitization process such as chart number, name, scale, revision date, and Notice-to-Mariners date.

BlueChart G2: Charts From Garmin®

The BlueChart g2 has a much smoother presentation plotter display, because the charts are electronically layered. It has all the detail of traditional BlueChart, but with additional functions like an optional 3D perspective, and tides and currents overlaid on the chart. Additional enhancements include general coastal road detail, marine services information, and improved IALA navigational symbols. Other chart features include shaded depth contours, port plans, wrecks, restricted areas, and more.
