Bazoooka Bailer®

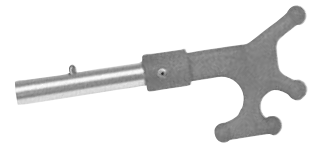

Combination boathook/bailer/power washer.

This product is one of the most durable boat hooks you will ever own. From it's hook to it's anodized aluminum shaft only quality parts and materials are used in this product's construction. The telescopic pole collapses nearly in half for storage and automatically locks firmly in place when fully extended. Two non-slip grips ensure a solid hold.

As a bailer the 8' model drains nearly a quart per stroke, and reaches into spaces few bailers can. Simply place the hook under water and extend the Bazoooka Bailer. The piston draws the water up a small hole located at the end of the hook. Made to withstand saltwater and bilge oil.

Finally, as a power washer, water is expelled from the Bazoooka Bailer approximately thirty six times faster than it's operating speed, giving it a firing range of over 50 feet and the power to clean. The Bazoooka Bailer is a handy product when cleaning hulls, cleaning decks or when you find yourself in a water fight!
