

## DE-0041 3.6 cu. ft.

- Designed for an enclosure
- Full-width freezer compartment
- Adjustable door bins allow for various container sizes
- Black exterior trim with optional door panel# NOR 623866
- Replaces DE-241, DE-441

H x W x D  
30-7/8" x 23-1/4" x 23-1/2".  
Installation Dimensions  
Excluding flange & door.

ORDER NO.	PRICE
NOR DE0041	\$1284.10
NOR 623866	\$36.47

## DE-0751 2.7 cu. ft.

- 2.7 cubic feet of interior space
- Flush and proud mount capability
- Door liner features 2 bins, lower bin holds 2-liter bottles
- Rear power supply and compressor placed high improve hull clearance
- Ergonomic handle/latch is integrated with door for a positive lock
- Controls and power supply at top for easy access
- Integrated circuit to sense high-current and auto re-set
- Automatic AC-to-DC change over
- Low noise and power consumption
- Heavy duty hinges are durable in the roughest conditions

**NEW**

H x W x D  
20-1/2" x 18-1/2" x 21".

ORDER NO.	DESCRIPTION	PRICE
NOR DE0751BB	With Black Door Panel	\$863.43
NOR DE0751SS	With Stainless Door Panel	\$1039.64

## Heavy Duty Marine Air Conditioner Recirculating Pumps

- Stainless steel/bronze construction/nylon volute
- Submersible or open air operation
- 6' power cord
- Complies with ABYC standards
- Thermal overload protection/Viton double lip seals
- Fresh or saltwater rated
- 3/4" NPT suction, 1/2" NPT discharge F/MS580 and MS1200
- 1/2" NPT suction, 1/4" NPT discharge F/MS320
- 304 stainless shaft with hard chrome plate
- 304 stainless steel motor housing

ORDER NO.	DESCRIPTION	APPLICATION	PRICE
CLV MS580	580 GPH Pump	Replaces March LC-3CP	\$262.57
CLV MS1200	1200 GPH Pump	Replaces March LC-5C	\$292.82
CLV MSUBM	Mtg. Bracket	580, 1200, 2700	\$27.13
CLV MSUB	Mtg. Bracket	320	\$27.13
CLV MSR5	Repair Kit	MS580	\$23.46
CLV MS320	320 GPH Pump	5000BTU Units	\$164.56
CLV MSR3	Repair Kit	MS320	\$21.60

## Dometic® MARCH PUMP

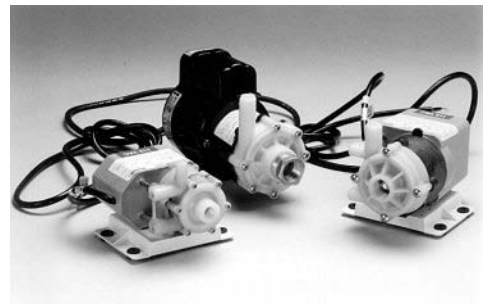

### Air Conditioning Pumps

For Commercial and Pleasure Craft

An excellent choice for providing seawater circulation for marine air conditioning systems. The proven magnetic drive eliminates the troublesome mechanical shaft seal. There is no seal wear, power-robbing friction, or leakage through the seal. The impeller and drive magnets are strong, permanent ceramic types, which prevent slippage, insuring that full motor power is converted into pumping power.

Centrifugal pumps require a flooded inlet and must be mounted below the waterline. "LC" models have liquid-cooled motors and can be run in open air or submerged. "AC" models have air-cooled, open drip-proof motors and must be in a dry environment. 115 volts.

Includes a marine grade base. Comes with a 6' power cord.
