

Air Heaters

The QL air heater extracts heat from the engine's cooling system, which would otherwise be wasted, and transfers it into the cabin giving you a warm, dry and comfortable atmosphere, and you avoid frosted or misty windows. The QL air heater is highly efficient and can be installed vertically or horizontally. Its compactness makes it easy to locate anywhere. Stainless steel for the casing and copper/brass for the heat exchanger ensures long service. 12 volt.

Dimensions: 10kW — 14-5/8" x 6-5/16" x 9-5/16"

ORDER NO.	DESCRIPTION	PRICE
