

"Marine Kettle" Gas Grill

14-1/2" dia.

Made of 100% 18-9 mirror polished stainless steel, this grill was designed for economy without sacrificing function. It will give you the safety, durability and performance required of a marine grill. It uses our time-tested, highly efficient radiant plate system in conjunction with convection heating technology to achieve hot, even temperatures while using a minimum of fuel. It quickly comes to temperature and is great for searing steaks or just grilling up some burgers and dogs. The grill quickly disassembles without tools for easy clean-up. The patented swiveling turbo venturi tube allows you to rotate the regulator/control valve where it is most convenient to you. It virtually eliminates blow-outs. This design also allows for quick safe fuel canister changes even while grilling.

- Requires grill mounting hardware for complete installation.
- Mounts and fuel canisters sold separately.

"Marine Kettle"® Charcoal Barbeque

Our "Marine Kettle" is meticulously crafted of 100% 18-9 mirror polished stainless steel for maximum corrosion resistance. Starts easily in windy conditions by using the lid as a windshield. You obtain perfect results through use of the rotating, adjustable height cooking grill and the variable temperature draft control door. Our "Marine Kettle"® design allows oven type baking to enhance the barbeque flavor while retaining the natural juices in the food. It will cook more food faster on less grill area than any other charcoal barbeque. Safety and efficiency are obtained by closing the temperature draft control door and extinguishing the coals for future use.

Requires BBQ mounting hardware for complete installation.

Features:

- Attached grill and lid (lid acts as windshield in gusty wind conditions).
- Attached rotating adjustable cooking grill.
- Complete temperature control.
- Lower charcoal grate and sealed ash compartment.
- 8 mounting options adapt to any boat.
