

**Smoked" tint Lexan\* MR10**

- Excellent for hatch lens replacement.
- Mar/U.V. and graffiti-resistant, unique coating enables restoration to a like-new condition
- Combines the impact strength of LEXAN polycarbonate sheet with a proprietary abrasion and UV-resistant MARGARD® II surface
- The only polycarbonate glazing material backed by a ten-year limited warranty against yellowing, abrasion resistance, breakage, loss of light transmission, and coating failure
- Tested for abrasion resistance, it exhibits significantly less hazing than uncoated polycarbonate sheets
- Has up to 250 times the impact strength of glass and 30 times that of acrylic
- Offers improved resistance to weathering and forced entry protection
- For transparent applications only
- Intended for flat applications only
- Cannot be cold-formed

ORDER NO.	DESCRIPTION	PRICE
GEL GE60	24" x 24" x .118 Lexan Smoke	\$70.00

**LEXAN\* XL10**

- Suitable for vertical glazing and overhead applications
- Designed to meet your forming requirements
- Excellent Impact Resistance
- Excellent Weatherability
- Excellent Clarity
- Fair Abrasion Resistance
- Good Chemical Resistance
- Excellent Temperature Resistance
- Excellent Degrees of Light Transmission
- Able to be printed
- Meets Code Approvals
- Available in clear sheets

GEL GE07	18" x 24" x .093 Clear Lexan	\$29.40
GEL GE38	36" x 48" x .093 Clear Lexan	\$119.05

A UV-Stabilized marine grade polymer, which makes it an excellent choice for applications where there is exposure to sun and saltwater. Its unique advantages are:

- It will not rot, delaminate, swell or splinter.
- The matte texture requires no painting, finishing, or maintenance.
- It will last the lifetime of your boat.
- Individually shrink wrapped.

**KING STARBOARD King StarLite®XL**

**Lightweight Marine Substrate Utility Sheet**

King StarLite®XL is an economical cellular (closed cell) utility sheet made from select high-grade King StarBoard® recycled polymer material. It is ideal for boat parts, as an upholstery substrate and in other behind-the-scenes applications where edges aren't visible. King StarLite®XL is up to 35% lighter in weight than King Starboard and it offers the same quality textured surface on both sides. Environmentally stabilized to withstand tough marine conditions

- Matte textured on both sides.
- Will not rot, swell or delaminate when exposed to humidity or water.
- Resists odor, even in wet environments.
- An excellent substrate for mounting instruments.
- Able to securely hold staples and screws.
- The perfect lightweight replacement for plywood.
- Flexes without breaking, unlike plywood or PVC foam products.
- Easy to clean and never needs refinishing.
- Perfect for upholstered parts. Bends without breaking.
- Easy to fabricate using standard woodworking tools.

Popular Applications:

- Cutting Boards, Deck Component and Equipment Mounts, Cockpit Covers, Tackle Centers, Recess Hatches and Bait Well Covers, Electronics Mountings, Doorstops and Thresholds

**KING STARBOARD**

**Sure Grip Marine Grade Polymer Sheet**

KING STARBOARD®AS

Unique, superior marine grade polymer material specifically designed for high traffic areas. This unique product combines the strength, versatility and durability of King StarBoard® with a special high-friction, polymer surface. The surface layer has a dot pattern texture that inhibits slippage and promotes water drainage.

KIN 2454W34	White	3/4" x 24" x 54"	\$191.14

**KING STARBOARD Marine Grade Polymer Sheets**

A unique, superior marine grade polymer sheet, environmentally stabilized to resist harsh sun and sea conditions, including ultraviolet light.

- Easy to fabricate with standard tools.
- Never needs maintenance.
- Unlimited custom/proprietary colors.
- Accents or matches gel coat.
- Made to last the lifetime of the boat.
- Marine grade polymer sheet has a matte texture surface.
- Will not rot, swell, or delaminate when exposed to moisture.

- Finishes cleanly.
- Forms easily for smooth bends.
