10-1/2" x 32"	TAY 950128										35' to 60'	\$143.24

Recommended inflation is 2 psi

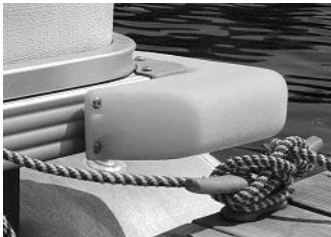

## Pontoon Fenders

Exclusively designed for the needs of pontoon boaters, these unique fenders offer a level of protection to areas on the pontoon boat other fenders can't provide.

**Pontoon Fender** is specifically designed to fit snugly between the pontoon and the deck of the boat, protecting both from rafting boats, docks, or other objects.

**Fence Saver** secures to the fence or railing and is designed to prevent contact to the delicate aluminum fencing. The fence saver is especially effective preventing those nasty dings that occur when rafting a pontoon boat to a conventional hull boat.

**Corner Fenders** come in two shapes for both radius style or 90° pontoon corners. The corner bumpers mount over the original factory installed aluminum corner section to provide air-cushioning impact protection when docking. Each corner section is molded from a special gray PVC formulated to match the aluminum color of the boat and secures with stainless fasteners. All pontoon fenders are made from marine-grade, UV resistant vinyl and have an integrated rubber football style valve for easy inflation.
