Outboard Steering

No-Feedback Steering Systems

The industry leader in steering introduces the most revolutionary advancement in mechanical steering since the Teleflex helical cable. Built with the same emphasis on safety, durability, and performance as the Safe-T, Big-T, and Rack Steering Systems, the newly designed No-feedback helm unit effectively eliminates torque feedback at the helm making for the easiest and safest mechanical steering on the market today!

NFB Steering Systems for Every Boat & Every Budget

Non-Power Assisted Outboards

NFB Safe-T II

The next generation of the world's #1 rotary steering system – now with the latest generation of No Feedback technology from Teleflex. This new ultra-smooth 3-turn system takes the work out of steering almost any outboard powered boat up to 120 H.P. or V-4 and 50 MPH top speed—the perfect upgrade for Safe-T steering systems.

Packaged Safe-T II Includes:
SH5150P Helm, SSC61 Cable, SB27484P Bezel

ORDER NO.	DESCRIPTION	PRICE

NFB 4.2 Rotary

An extra mechanical advantage (4.2 turns lock-to-lock) reduces steering effort while the patented clutch locks out steering loads. 4.2 NFB is the OEM's top choice. Available in single cable configuration for V-6 and smaller, 0-50 MPH top speed and dual cable configurations for faster boats.

Packaged 4.2 Rotary Includes:
SH4910P Helm
SSC61 Cable
SB27484P Bezel
