

**Sterndrive Steering**

**Safe-T Quick Connect Steering System**

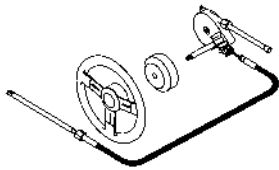

The Safe-T Steering System is the OEM choice for safe, simple, reliable steering for boats up to 24 ft. range. To enhance the simplicity of this design, we now offer the Safe-T Quick Connect system. This system does not require tools to connect the cable to the helm, therefore reducing installation time up to 50%. We have also trapped the nut on the engine end which saves time chasing coupler nuts during engine installation. Twin cable systems recommended for boats that exceed 50 g steering instability from engine flutter.

**Features:**

- Compact rotary helm unit occupies minimum space behind the dashboard.
- 3 turns lock-to-lock for standard travel.
- Variety of bezels offer mounting flexibility.
- Stainless steel cable output ends minimize corrosion.
- Standard 3/4" tapered shaft.
- Exceeds BIA certification requirements.
- Exceeds A.B.Y.C. safety standards.

**Applications:**

- Boats up to 24'
- Single engines
- O/B runabouts
- Pontoon boats
- Steering wheels up to 16"
- See safe steering page
- Bass boats
- Small cruisers

**SS137 SAFE-T**

Packaged Quick Connect System Includes Helm (SH5094), Bezel (SB27447), and Quick Connect Cable (SSC61XX)

- Key refers to "Kit Components"

**CAUTION:** Many factors affect steering loads. To avoid potentially unsafe combinations, it is best to confirm your selection with your Teleflex expert.
