rule Gentle-Flow™ Oxygenator Livewell Kit

Designed with the patented infuser technology and a Gentle-Flow directional discharge, the Rule Gentle-Flow™ Oxygenator is the ideal system for keeping bait and catch alive and healthy. The patented infuser technology introduces air into the base of the livewell pump through the air control center producing millions of micro-fine bubbles. Because the bubbles are so small, they remain suspended in the water longer, providing more aeration to your delicate bait and catch. Designed to fit almost any custom tank. Kits come complete with a pump, directional discharge, intake strainer, hose and intake valve.

MARINE TECHNOLOGIES INC High Bilge Water Alarm

- Proven Mechanical Float Technology prevents false alarm.
- Install at the helm or in the cabin
- Compliant with ABYC Standard H-22
- Visual and Audible Alarm Indicator. Dual signaling before maximum bilge water conditions exist, sounds an alarm & activates warning light.
- Marine Proven. Exclusively designed for the harsh marine environment. Sensor has been used in bilge's for over 15 years, not effected by fuel spills or other chemicals.
- Float Sensor. Monitors bilge for high water. Will not false alarm from morning dew, high humidity, splashes, hose over spray or buildup of oil or contamination.
- Microprocessor controlled to eliminate false alarms from rough seas, chop and vibration.
- Test/Mute button - tests alarm with a push of a button. Mutes alarm while boater investigates the problem.
- Power 12 VAC, operational range 7-28 volts.
- 10 mA (.01 amp.) current draw allows "always on" operation.
- Alarm triggers before maximum bilge water level is reached.
- Loud 100 decibel alarm alerts boater while under way.
- Display Panel Size: 3-1/4"W x 2-3/4"H x 3/4"D.
