

## Hot Water Heaters

Raritan's 1700 Series Hot Water Heater is a radical departure from the status quo. An impact resistant polymer jacket eliminates the possibility for rust or corrosion. Environmentally sensitive CFC-Free insulation provides the benefits of more rigidity and more efficient insulating ability...the new heat exchanger design coils evenly throughout the interior of the tank and delivers more rapid, even heating. The 1700 Series Hot Water Heater also has other impressive features such as ignition protection, thermal overload protection and a 5 year tank warranty. Replaces previous model hot water heaters with nearly identical space requirements and fitting locations.

## Water Heater

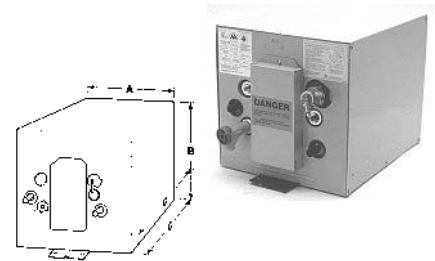

### Atwood Corrosion Resistant Exterior

The casing of every Atwood Electric Water Heater is constructed from corrosion resistant materials and then carefully painted to stand up against the most corrosive marine environments. Special attention to detail on edges and corners helps assure greater handling safety.

### Forgiving Incolloy Element

Each Atwood Electric Water Heater is equipped with a high quality 120 volt/1500 watt\* incolloy heating element designed to withstand accidental operation in an empty tank. The electrical system is ignition protected and meets UL specifications.

## KUUMA Water Heaters

All 120V corrosion-resistant water heaters have aluminum tanks and stainless steel casings. A 7/8" heat exchanger for better heat exchange in all heaters ensures more efficient heat control through increased surface area. Complete with ignition-protected controls, high temperature, and high pressure valve installed. These units are available in 6, 11 or 20 gallon sizes. All models have the same standard features - the only difference is the water capacity. Mounts are on the front and back of heater. Optional TCV (temperature control valve) can be added to prevent scalding by decreasing flow of engine coolant when desired temperature is reached.

## Temporary Water Heater Bypass Kit 8"

By pass your water lines when winterizing.

## Permanent Water Heater Bypass Kit 12"

- For 6 and 10 gallon tanks
- Non toxic components
- 1/4 turn valves quickly and easily bring water heater back on line
