THM HAT13302	13" x 30"	\$200.29

LEWMAR® Low Profile Hatch

The curved upper frame profile provides soft fluid styling and adds strength. Improved friction lever performance has resulted in fewer friction levers being required on larger hatches to hold the lid open, increasing visibility through the hatch. Improved stronger lower frame design with higher breakwater. The cut out in the deck is to Lewmar's standard sizes. All Low Profile Hatches have lids which open to 180° and are self supporting to around 90°. For applications where additional support or restricted opening is required, such as on power boats, the Low Profile Hatch can be supplied with a stay fitted. The stay is also available as a retro-fit item.
