

1115 and 1323 Slam Hatch

The Access Slam Hatch is made from a glass filled polypropylene, for strength and durability. Designed for heavy traffic areas, and will withstand people walking or standing upon them. Features an easy close slam latch that forms a weather tight seal just by closing the hatch. Access Hatches also utilize a patented integral hinge assembly that allows for easy lid removal. The beveled and skirted lid covers all fasteners for a clean look above or below decks. The perfect choice for easy dry storage, access to bait or fish wells, or electrical and plumbing lines. White.

Requires #12 Pan Head self tapping screws.

Stainless Steel Series Gas Springs

The pressure tube and rod is super-tough #316 stainless steel alloy. All other exposed components are stainless steel or marine-grade composite. This hardware is the best choice for saltwater use—and any other application where good looks and quality really matter. They're the best springs you can buy for livewells, line lockers, deck hatches, and other moisture-prone areas. End fitting type = 10mm socket composite.

Hybrid Series Gas Springs

Attwood's Hybrid Series offers the look and performance of a stainless steel spring at a fraction of the price. The Hybrid Series boasts a stainless steel rod, advanced seal system and a clear coated steel body that allows it to withstand the harsh environment typically found in marine applications. End fitting type = 10mm socket composite.
