

658 | DRAINS, THRU-HULLS, VALVES

Attwood's scupper is mounted on the transom, slightly above the boat's water line. The rubber flapper valve opens outward to allow water out of the boat when necessary, but seals back to prevent water from entering the boat. For boats with self bailing cockpits.
Diameter: 2-7/8".

Flow-Max™ Ball Scupper

Tired of scupper leakage? Replace your old worn-out flapper scupper with this positive sealing ball scupper. Easy twist-off design makes cleaning debris a snap. Simply twist to remove ball cavity, clean out and twist back on. Stainless steel security pin provided for added safety. Larger exit hole allows 70% more water drainage than its nearest competitor. Multiple mounting holes make retrofits quick and easy—no filling holes or re-drilling. Neutral buoyancy ball insures ball won't float up and break seal. Meets all ABYC standards.
