

Fein Dust-Free Sanding Systems

**The Fein Turbo II – Dust Free Vacuum
Wet / Dry Vacuum with Outlet for Electric Power Tools.
Features Automatic On / Off Triggered by Connected
Power Tool**

The New Fein Turbo II Dust Extractor is powered by a two stage motor, with by-pass cooling. By-pass cooling assures that the motor runs cool even if the hose or filter are blocked. When you plug your Fein Dust-Free Sander into the outlet on the Fein Turbo II's faceplate, and set the switch to Auto; the extractor starts automatically when the Sander is switched on. Turning the Sander off also turns off the extractor. Our automatic On / Off electronic switch will handle power tools with inputs of 40 to 2000 watts (0.3 - 19 amps). The Fein Turbo II comes standard with a fabric boot that contains dust down to 0.5 microns. You don't need a filter bag unless you want one.

ORDER NO.	DESCRIPTION	PRICE
FPT 95513	115 Volts	\$435.00
FPT 913036K01	Dust Bags (3-pk)	\$14.10

FPT FBK	\$48.20

Fein Polisher

In a field of polishers, the new FEIN WPO 12-27E is the one to pick to win. It does the job of tools weighing twice as much. It gives you a more consistent finish. And, it dramatically reduces production time. The reason for its superior performance is an efficient new motor, sophisticated electronic feedback circuitry and a unique planetary gearing system. You get constant RPM whether you're feathering a delicate area at 900 RPM or polishing a large surface at 2,700 RPM. Because of FEIN's more efficient design, polishing, brushing and light sanding jobs will get done faster than ever. With consistent RPM, there is no need to go over and over the same area. You get a perfect finish on all kinds of different material from cultured marble to stainless steel.
