GullswEEP®

The GullswEEP keeps gulls off your boat by continually sweeping the area where they usually land. The GullswEEP is made of materials that are very resistant to the effects of salt water. The arms are bright anodized aluminum. All other metal parts are stainless steel. The GullswEEP will rotate in the slightest breeze. The GullswEEP is easily mounted on a hard or soft top. On a soft top the method of mounting will not cause a leak. When not in use, it folds for convenient storage. Best of all, it really does a fine job at keeping your boat free from gulls.
