

The **Archaea microbes**, invisible to the naked eye, are supplied in powder form using a clay carrier. A unique process is used to form them into tablets without using binders or additives so that concentration levels will not be compromised. The tablets are then inserted into an open cell foam carrier that floats and absorbs 32 times its weight in oil. The microbes will lie dormant for up to five years until activated by oxygen, nutrients, motion and hydrocarbons on water's surface. Once activated, the microbes will multiply, doubling in numbers every 20 minutes, becoming a bioreactor.

Our microbes digest the hydrocarbons - such as MTBE, oil, gasoline, diesel, nitrates, kerosene, marine deposits, and also animal feces, fish blood, and even odors - until they are gone. The microbes will turn the hydrocarbons into water-soluble fatty acids, which are food for fish and ocean vegetation. This process is known as bioremediation.

Microbes are nature's way of recycling. They can adapt to any circumstances. The Environmental Protection Agency, EPA, lists them on the National Contingency Plan. Our microbes are weaned on Texas crude oil and ammonia. They are naturally occurring, non-toxic and non-pathogenic, and they will function from 30°F to 110°F.

Oil Eradicators

Whale

1" x 3" x 5" foam carrier.

- Use in your bilge (runabout, small bilge)- toss it in and it absorbs
- 32 times its weight in oils/pollutants.
- Replace every 60 to 90 days if there is an ongoing problem.
- For smaller boats - 15'-20'.

ORDER NO.	CTN.	PRICE
CWS A141001	12	\$13.95

Sardines

3-pack of 1" x 1.5" x 6" foam carriers.

- A full season of protection for a small boat or for a larger boat with multiple bilge chambers.
- Replace every 60 to 90 days.

ORDER NO.	CTN.	PRICE
CWS 141002	12	\$24.95

Grouper

1" x 4.5" x 6" foam carrier.

- For larger boats (40' and up), larger flat bilge areas.
- Replace every 60 to 90 days.

ORDER NO.	CTN.	PRICE
CWS 141003	12	\$19.95

Barracuda

2' x 3" x 1.5" foam carrier.

- For narrow bilge spaces.
- Replace every 60 to 90 days.

ORDER NO.	CTN.	PRICE
CWS 141004	12	\$39.95

Clean Water Blue

- Biodegradable liquid soap.
- Squeeze or spray and scrub with a stiff brush or broom

ORDER NO.	SIZE	CTN.	PRICE
CWS 143001	8 oz.	12	\$10.95
CWS 143002	32 oz spray	12	\$24.95

Clean Water Microbial Powder

Sprinkle Clean Water Microbial Powder™ on a fuel or oil spill to get quick action and containment. Use in conjunction with Barracuda or Orca to help absorb the material as well as eradicate it.

ORDER NO.	SIZE	CTN.	PRICE
CWS 145002	6 oz	12	\$15.95
CWS 145003	28 oz	12	\$45.95

Oil Clean Up Kit

Total bilge/spill/emergency response systems - including all three types of microbe systems. Use the sponge/microbe unit in your bilge in conjunction with the aerator system to assure thorough and timely elimination of pollutants.

Keep the powder and the liquid soap handy for quick clean up and response.

CWS 142999	12	\$25.95

Navalkleen

Navalkleen Small Craft Formula is a concentrated liquid cleaner and degreaser. The unique and innovative bio-remedial action of the hydrocarbon degrading microbes in this product make it the ideal solution for a persistent boating problem. When used as directed **Navalkleen Small Craft Formula** will clean, deodorize and neutralize any harmful, polluting & dangerous hydrocarbons in your recreational vessel. The bio-remedial process will convert all these contaminants into carbon dioxide and water. This process makes Navalkleen Small Craft Formula™ unique among other cleaners that may be either harmful to your health, harmful to the aquatic environment or both. **Navalkleen Small Craft Formula** is very concentrated and therefore is economical to use as often as needed. Its fresh citrus scent will help to control "musty" marine odors and enhance the entire vessels recreational environment.

APPLICATIONS

Effectively Cleans: Oily Waste, Motor Oil, Grease, Tar, Gasoline, Diesel Fuel, Solvents, Kerosene. Cleans: Bilges, Decks, Hulls, Wood, Fiberglass, Metal, Glass.
