

MAPTECH[®] Chartkit Books with Companion CD

Used by generations of boaters, ChartKits are full-color reproductions of U.S. government and private charts spiral bound into popular cruising regions. The convenient-sized books are large enough to allow for manual plotting, yet small enough to sit on your navigation or lap.

NEW

- **GPS Ready**

New features make ChartKits easy to use with your GPS. Most charts include one-minute lat./long. grids to make vessel positioning a breeze, and major navigation aids are identified with named GPS waypoints.

- **Small and Large Scale Charts**

ChartKits include small-scale, wide area charts as well as large-scale, detailed charts of harbors and approaches. The Chart Page Index (inside front cover) and "Go-To" page numbers make it simple to quickly find the chart you want.

- **Pre-plotted Courses**

Maptech's navigation editors add magnetic courses between major navigation aids with distances in nautical miles. ChartKits are also designed to help you do the calculations yourself. Each page includes a Compass Rose with annual increase in variation and complete scale information

- **Aerial Photos**

Color aerial photos of harbors and anchorages help you know what to expect before you get there.

- **Companion CD**

It's all here...digital charts and the software tools to use them. And the great thing is the digital charts are the same identical charts with GPS waypoints and course lines – just like in the Chartbooks.

ORDER NO.	DESCRIPTION	PRICE
MPT PAPERREGION02	Block Island, RI to Canadian Border, 86 pages	\$129.95
