

MÖLLER
Zinc Primers

- For aluminum surfaces above or below the waterline use our Zinc Chromate. This powerful primer etches into the aluminum, forming a strong surface/primer union that is resistant to corrosion.
- For steel and iron surfaces, especially welded joints, above or below the water line, use our Zinc Cold Galvanizing or Zinc Phosphate. This corrosive barrier contains a high percentage (95%) of zinc, for maximum resistance against solvents & abrasions.

ORDER NO.	DESCRIPTION	PRICE
MOE 025421	Zinc Chromate Yellow	\$13.90
MOE 025472	Zinc Chromate Green	\$13.90
MOE 025802	Zinc Phosphate Green	\$13.90

VC-Offshore with Teflon® – Saltwater Performance Anti-Fouling Paint

VC-OFFSHORE is high strength, vinyl antifouling enhanced with TEFLON technology. This gives outstanding protection against marine growth in both fresh and saltwater and gives you the low friction super smooth surface so important to the performance conscious boater. VC-OFFSHORE'S hard durable finish withstands the rigors and demands of the active powerboat owner as well as providing the slickest surface available to the racing sailor.

PETTIT
marine paint

Zinc Coat Barnacle Barrier

This product is for use only on bare metals such as steel, stainless steel, cast iron, copper, bronze, galvanized steel and lead. It forms an excellent adhesive bond to underwater metals and running gear and inhibits corrosion on these surfaces. Because of its smooth, hard surface it will self-clean in service.

Do not apply antifouling paint over Zinc Coat.

EPIFANES **Gloss Varnish**

Outstanding – exceptional – highest quality: all are used to describe our Dutch varnish, giving it the reputation for being the best in the world. This marine spar varnish is manufactured with a long base of Chinese tung oil combined with non-yellowing alkyd and urethane resins and blended with a perfect balance of U.V. inhibitors. Used and tested in the Caribbean for over 25 years. EPIFANES has proved to last two to three times longer than its best competition.
