**Motor Driven Remote Control Searchlights  
5" (130RC) & 7" (200RC) Sizes**

Gives you fingertip control from anywhere on board your boat! The completely motorized drive unit is enclosed in light housing. Our exclusive Clutch-A-Matic feature protects the drive unit against overload and allows light to be operated for extended periods against limit stops without harm. Light head can be moved manually without damage. The 7" model is constructed of solid brass with a polished chrome finish, designed for handling severe marine conditions. The 5" model is constructed of an electro-polished stainless steel that will not tarnish or rust. All light models include new watertight control. The 5" models include a separate 8' wiring cable with plug connectors on each end. The 7" models include 9' of wiring cable from light base with plug connector on one end. Secondary control panel no. 43670-0004 is optional. Additional cable assembly may be required for installation of secondary control.

**Wireless Remote Control**

- Adds wireless control to existing searchlight installations for both console and remote control operation
- Can be installed for wireless-only operation
- 12 and 24 volt operation
- True 8-way directional control with instant response for precise targeting
- "On/off" and "spot/flood" (applicable models) function selection with LED battery check
- Long life lithium batteries for hand-held remote control
- Meets all regulatory requirements for FCC
- First "on" learning mode syncs transmitter and receiver codes for no cross-talking with other remote control devices
- Power saving "sleep mode" when not in use
