**Interior / Courtesy Lighting  
LED Lights Stainless Steel**

The Attwood L6300 Series LED lighting system represents state-of-the-art design guided by convenience, durability and efficiency. The transition to LED technology virtually eliminates the maintenance associated with typical halogen/xenon interior lighting. Rated for 50,000+ hours of use, and protected by a 10-year warranty. While offering a low maintenance solution to traditional marine lighting, the L6300 Series lights reach a new level of safety for consumers. By reducing surface heat by nearly 100° F over traditional halogen lighting, our lights eliminate the safety hazard that can occur if lights are left on for an extended period or are placed under or near low-lying cabinetry.
